

# Anthony Astige

Anthony@Astige.com  
(510) 982-6603  
San Francisco Bay Area, CA

---

Senior Front End Engineer                      Facebook, Inc                      2019–Present

---

- Just getting started, figuring out where I can make the most impact!

---

Senior Software Engineer                      Brightidea, Inc                      2017–2019

---

- Initiated and led **React Native / React Native Web** research, presentation, and architecture enabling faster development and feature parity within our legacy **Web / Android / iOS** product
- Mentored three developers in our new **React / Redux / Thunk** architecture through code reviews and coaching, leading to their direct front end contributions
- Built a **Jest / Enzyme** framework, reducing bugs and enabling test driven development
- Led front end engineering meetings, honing problem solving, prioritization, and action
- Saved hundreds of dev hours by automating code formatting via **Prettier / ESLint / Git / Bash**
- Used **responsive CSS** to enable mobile use on pages with tens of thousands of daily views
- Enabled our on stage annual release by architecting for five engineers to work simultaneously, and personally abstracted complex modern **JavaScript / SCSS** modules

---

Owner and Student                      Zinid LLC                      2014–2017

---

- Created a real time **Meteor.JS / MongoDB** food tracking web app at trackmyfoods.com
- Learned **React** foundations by creating a YouTube game in ten days at beats.zinid.com
- Used **Ubuntu / Glitch / Firebase / Node / HAProxy / PM2** to host anthony.astige.com
- Volunteered and mentored at Code for Eau Claire to develop community web applications
- Traveled internationally, learned residential repair trades, flipped a house, and had a kid

---

Owner                      Anthony's Web LLC                      2010–2014

---

- Led **PHP / MySQL / JS / HTML / CSS** app development in education, electronic recycling, genetic engineering, non-profit, medical, social media, social networking, and sports
- Improved code quality across a dozen clients by convincing a single nontechnical client to fund Anthony's Web LLC in creation and open sourcing of full stack coding standards
- Setup **Linux / Apache** cloud development servers, enabling remote collaboration
- Interviewed, hired, and trained a team of five developers
- Streamlined processes via Google Calendar and Basecamp's API, creating thousands of tasks
- Drafted worker schedule contracts, created client worker collaboration procedures, and setup a billing system to serve more than a dozen clients

---

Principal Software Developer                      Anthony's Web Development                      2006–2010

---

- Supported two hundred million dollars in sales by using **CakePHP** to make fantasyjunction.com
- Made a gaming fan site with **PHP / MySQL / SEO**, generating ten million views over five years
- Improved a gaming tournament site hosting hundreds of matches with **PHP / MySQL / jQuery**

## Education

Earned ninety credits towards a Computer Science degree at UC Berkeley                      2001–2005
